

# Altaro Oops!Backup

Easy to Use PC Backup Software.

Backup & automatic versioning of docs, images and other files allows you to preview & restore versions of your files from different points in time.

## ✔ BackInTime: A time machine for Windows

BackInTime technology is unique to Altaro. It enables you to travel back in time to find and recover changes made to your documents, photos and any other files at any point in time.

## ✔ Fully Automatic - No Hassle (CDP)

Works silently in the background tracking changes made to MS Office documents, photos and other files. It then backs the changes automatically.

## ✔ Very Fast Backup & Restore

Your data is protected every time you make a change - without slowing down your PC.

## ✔ Automatic Backup with Plug & Protect

Automatically initiates a backup once the backup drive is connected to the computer.

## ReverseDelta Incremental Technology

ReverseDelta is technology developed by Altaro Software that enables Altaro Oops!Backup to only save the changes between each version of a changed file, rather than storing the whole file every time it changes.

Most backup solutions keep the first backup and save the changes (deltas) since that first backup, which, after a few weeks or months can become much more complex to restore.

With ReverseDelta, the most recent backup is always a full file. This means that if you require the latest version of a file, it is possible to access it directly from your backup drive without having to rebuild it from delta files.

# Altaro Oops!Backup

---

## Easy to Use PC Backup Software

### ✔ Integration with Microsoft Volume Shadow (VSS) Copy

Integrates with Microsoft Volume Shadow (VSS) technology. This integration allows Oops!Backup to automatically back up files that are currently open and in use.

### ✔ Backup to your network or NAS drive

If you have a network drive or a NAS then you can configure Oops!Backup to backup directly to it by mapping the network location to your computer.

### ✔ Save Space - using ReverseDelta™ Technology

Using its ReverseDelta™ incremental technology, Oops!Backup will only back up the actual changes you make to a file – without needing to back up the whole file again every time you make a change.

## Licensing

Altaro Oops!Backup is licensed per PC. This means that if you install it on 1 PC you only need 1 license, even if the PC is being used by many different users.

## Supported Environments & Backup Destinations

### Operating Systems:

Windows 7 - All Editions - 32 and 64 bit  
Windows Vista - All Editions - 32 and 64 bit  
Windows XP SP3 - 32 bit only

### Supported Backup Destinations:

USB & eSATA External Drives, NAS & SAN systems, iSCSI, File Server UNC paths.
